DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-14, drawn to a brake system, classified in class 188, subclass 10.
 - II. Claims 15-21, drawn to a remote system for a trailer, classified in class 239, subclass 172.

The inventions are distinct, each from the other because of the following reasons:

2. Inventions I and II are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case the inventions are different because the brake system can be used with any trailer not necessarily a water tank with a remote controlled system as claimed in claims 15-21.
3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.
4. A telephone call was made to Timothy Barlow on 7/12/04 to request an oral election to the above restriction requirement, but did not result in an election being made.

Art Unit: 3683

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
